## **SECTRA SIGNS AGREEMENT TO DISTRIBUTE ITS BREAST IMAGING PACS WITH INTEGRATED PENRAD SOLUTION**

**Shelton, CT – March 29, 2012 – International medical technology company, [Sectra](http://www.sectra.com) (NASDAQ OMX Stockholm: SECT B), announces an agreement to distribute PenRad™ mammography information system (MIS) fully integrated with Sectra Breast Imaging PACS.**

“We developed a strategic distribution agreement and bi-directional integration with [PenRad](http://www.penrad.com), a leading mammography information system provider to offer our customers convenient, one-stop-shopping and improved integration and workflow efficiency,” says Jeff Desiderio, director of women’s healthcare for Sectra in North America.

Sectra’s Breast Imaging PACS is a web-based, multi-modality workstation with advanced diagnostic tools that offers a powerful reading environment for high volume women’s imaging centers and for those wanting to increase tele-mammography services. All digital breast images, even breast tomosynthesis, regardless of modality vendor, are automatically displayed in the same size with correct orientation and alignment, facilitating comparison of current and prior images. Breast imaging providers can experience increased reading efficiency by utilizing Sectra Breast Imaging PACS for all modalities.

### **About Sectra**

With more than 20 years in the business, Sectra develops and sells IT systems and services for radiology, women’s health, orthopaedics and rheumatology. More than 1,100 hospitals, clinics and imaging centers worldwide use the systems daily, together performing over 55 million radiology examinations annually. This makes Sectra one of the world-leading companies within systems for handling digital radiology images. Sectra’s systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East. For more information, visit [www.sectra.com](http://www.sectra.com)
