Your patients worry less. You spend less. PenConnect.

Does your Mammography Information System offer this stress-relieving & money-saving solution?

PenRad systems can be expanded to reduce cost and patient anxiety by using the PenConnect system. This provides instant result and reminder notification by Email and/or a voice message. If the message is not retrieved in a timely manner, the correspondence is automatically printed for mailing.

Reminder by Phone
Reminder by Email

Whenever a message is retrieved, the information is automatically recorded for an audit trail. The results information can be automatically delayed to allow physicians an opportunity to review the exam prior to patient notification. The system uses your facility's internet connection along with PenConnect IP phone technology. The PenConnect system reduces patient anxiety and saves you time and mailing expenses.
