

**We'd like to announce  
paperless digital QC  
for only a dollar a day.  
PenRad D/QC.**

## **Does your Mammography Information System offer the newest technology at the lowest prices?**

Partner with PenRad in reducing the cost of healthcare. PenRad's Digital QC module is designed to monitor all brands of FFDM equipment and includes special features such as one-glance technology that displays the operational status of your facility on a single screen. Auto-remind allows instant visualization of the current status of your facility while the variance-alert lets facilities know when variances are exceeded.

Participate in cost savings with PenRad and create efficiencies by making your practice paperless for as little as \$1.00/day. Eliminate the high cost of license agreements by becoming a member of the PenRad family of cost savings products. Simply schedule a webinar to learn more about the family of products and the most advanced mammography information system available in the market today to become eligible for the D/QC module for your facility for as little as \$1.00/day.

By offering all the administrative and diagnostic pieces needed for a Breast Imaging Center, facilities using PenRad see their workflow efficiency increased. The PenRad Mammography Information System is the only one to offer these exclusive administrative and diagnostic features, let PenRad show you the way to increase your efficiencies, save your facility time and money and reduce the cost of healthcare.
