

# Mega-millions in new technology means mega-savings for you.

## PenView.

## **PenView advances radiologist efficiency and professional productivity at reduced expense.**

PenRad has partnered with leading entrepreneurs to offer the next generation of diagnostic tools to advance radiologist efficiency and professional productivity at a reduced expense. Say no to non-integrated systems, multiple workstations, empty promises, and excessive service contracts.

PenView, our SoftCopy IHE compliant workstation powered by EBM is rated by Radiologists as a quantum leap in breast imaging. Interpret with greater efficiency and productivity with an integrated platform for all modalities and report generation. Already digital? Just add PenView to your existing hardware.

Our PenAide module, powered by Medipattern's B-CAD expands capabilities to real-time automatic feature extraction from the ROI for report generation. PenRad's Profiler builds your own abnormality imaging database for research, teaching, statistics, and clinical support all with biopsy correlation.

And our Breast MRI component is powered by Clario, providing real-time and interactive thresholding, registration, parametric mapping, morphology and 3D MIPs, taking MRI interpretation to the next generation.

PenRad offers solutions to advance professional productivity and to reduce expenses for breast imaging centers. Interested in learning more about PenRad solutions, call 763.475.3388 for more info or to schedule a webinar or visit our website at [PenRad.com](http://PenRad.com)
