

# No more pencils, pens, history forms or recycling bins.

## The wireless history form has arrived.

Introducing PenWHF, our Wireless History Form tablet. Now your patient can update their information with simple prompts in a yes or no format that validates their personal and historical data.

And when they are finished they can watch a BSE video or any other educational or promotional videos. And another thing about the tablet, it can follow them around like a pager. At around \$200 it will not break the bank.

PenRad offers solutions to advance professional productivity and to reduce expenses for breast imaging centers. Interested in learning more about PenRad solutions, call 763.475.3388 for more info or to schedule a webinar or visit our website at PenRad.com
