Carestream Health To Market PenRad's Patient Tracking System With Its Multi-Modality Breast Imaging Workstation

ROCHESTER, N.Y., May 17 — Carestream Health announced an agreement with PenRad Technologies (Minnetonka, Minn.) to market PenRad's patient tracking and mammography information system (MIS) to U.S. healthcare providers. PenRad systems can be seamlessly integrated with [Carestream Health's mammography workstation](#), which can be connected to a PACS from Carestream Health or other vendors.

This upgrade is available for existing users of Carestream Health's mammography workstation as well as with new orders.

"Carestream Health already has one of the most powerful and flexible multi-modality breast imaging workstations available. This new agreement enables us to supply flexible solutions that simultaneously expedite viewing and reading of mammography exams as well as tracking of patient data and images," said Ron Muscosky, Worldwide Product Line Manager, Healthcare Information Solutions, Carestream Health.

PenRad's PenTrac automates management of patient recalls and reminders, letters, statistics and MQSA reports to improve efficiency and standardization in mammography patient tracking and reporting. In 2010, PenRad was recognized by KLAS as the leading MIS for the third consecutive year.

Carestream Health offers a comprehensive digital portfolio of women's healthcare solutions that includes: CR-based mammography imaging systems; mammography modules for its RIS/PACS platform; a multi-modality breast imaging workstation that allows reading of all breast imaging modalities as well as general radiology exams and high-resolution output to laser imaging systems.
